EDUCATION

MSc in Computer

Science and Engineering

2022 – 2025

NOVA School of Science and Technology | NOVA SST

- Focused on Software Engineering 17/20

BSc in Computer Science

and Engineering

2019 – 2022

NOVA School of Science and Technology | NOVA SST

TECHNICAL SKILLS

- Java
- Kotlin
- Spring Boot
- PostgreSQL
- Docker
- Kubernetes
- AWS
- REST APIs
- Git
- React
- Javascript

LANGUAGES

Portuguese
Native

English
Fluent

PROFILE

Software engineer building distributed systems in the financial crime and automotive compliance domains. Java, Kotlin and Spring Boot, on AWS with PostgreSQL and Kubernetes. Ten years playing handball at national level and five coaching it taught me most of what I know about working in a team.

WORK EXPERIENCE

ComplyAdvantage | Software Engineer

May 2026 – Present

Software engineer on the Migration Tooling team, building the compatibility layer that lets existing customers move onto the company's next-generation screening platform without changing their own API integrations. Shipped endpoints matching the legacy API contract exactly, and defined the model the team uses to sequence that work, prioritising by which customers each endpoint unlocks rather than by revenue.

Critical TechWorks | Java Backend Developer

October 2025 – April 2026

Built and maintained Java services for the BMW Group's Emissions Services platform, which processes vehicle emissions data at the scale of a production fleet. Cloud-native on AWS: Docker, Kubernetes, PostgreSQL, deployed on Payara.

Sandbit | Software Developer

January 2024 – July 2025

Part-time role on the team building the Sandbit platform, working across the codebase and owning technical documentation for the product as it was delivered.

Colégio São João de Brito | Handball coach

October 2020 – June 2025

Coached children aged five to twelve for five seasons, running weekly training and match days. Played handball at national level for over ten years across six clubs, including Os Belenenses and AEFCT NOVA.

Mercedes-Benz.io | Backend Summer Intern

July 2023 – September 2023

Built and tested backend services in Kotlin and Spring Boot alongside the platform team.
